

Medlemsmøte i NUUG 2008-12-09:

An introduction to model-driven development

Norwegian Unix User Group (NUUG) inviterer til medlemsmøte i NUUG Oslo. Alle medlemmer og ikke-medlemmer er velkomne. Arrangementet er gratis. Etter foredraget (fra ca. 20:30) blir det sosialt samvær.

Tid: Tirsdag 9. desember 2008 kl. 18:30
Sted: Høgskolen i Oslo, Pilestredet 35.

Presentasjonen starter presis, og dørene inn til auditoriet er låst, så det er lurt å ankomme før 18:30 mens det er folk i døra til å slippe deltagerne inn. Foredraget er med Lionel Briand og vil foregå på engelsk.

Test-driven development and agile methods are popular today, but they also make us lose sight of the main issues in testing and it's relation to software development in general. The purpose of test automation is to create confidence in software despite limited constraints and complex requirements. Lionel intends to clarify these issues for us, introduce us to model-driven development, and tell us of known strategies and when they apply, with a particular focus on the use of Unified Modeling Language.

Lionel Briand is the new head of the software testing & quality group at simula.no and a professor at the University of Oslo. He has been department head at the Fraunhofer Institute for Experimental Software Engineering, Canada Research Chair in software quality engineering, and research scientist at NASA. He was also the general chair of the 2008 IEEE conference on software testing, verification and validation (ICST) and he has more than 120 peer-reviewed publications. He currently works with companies such as Siemens, ABB, DNV, and Tandberg.

Inngangen til høyskolen er ved trikkeholdeplassen Holbergs plass.

Vel møtt!
Mvh, aktive@nuug.no
